APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

That the applicant assumes responsibility in-so-far as the land claimed to have been formerly irrigated by water of Red Mountain Creek is concerned. The proof of appropriation referred to in this application describes only 213.7 acres as having been irrigated by water of Red Mountain Creek jointly with water of other sources, while a cultural map made by a representative of this office and filed in connection with the proof referred to indicates that 307.25 acres as named in this application has been irrigated. Inasmuch as a water right for a portion of the said 307.25 acres may later be established from other sources, this permit is definite and conclusive only as to the 3.07 cubic feet per second of water involved.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3.07 cubic feet per second.

Actual construction work shall begin on or before Nov. 1st, 1917.

Proof of commencement of work shall be filed before Dec. 1st, 1917.

Work must be prosecuted with reasonable diligence and be completed on or before Nov. 1st, 1918.

Proof of Completion of Work shall be filed before Dec. 1st, 1918.

Application of water to beneficial use shall be made on or before Nov. 1st, 1922.

Proof of the application of water to beneficial use must be filed with State Engineer on or before Dec. 1st, 1922.
